

Sprint 1 Review

Expectations

1. Completed use-cases covering broad use of the system.

Comments: There was a good list of use cases that seemed well thought out.

2. Created UML covering the system.

Comments: You guys should consider creating a sequence diagram for interacting with your choice of movie API.

3. Version₀ project created in team repository, being worked by team following software dev standards, and deployed to AWS using Jenkins.

Comments: There was no project up on AWS and Jenkins was not set up.

4. Demonstrated use of Jira.

Comments: Going forward make sure that you guys utilize Jira better. There should be more tasks and more evidence of activity.

Grade: C
